RE: Comments of October 30, 2005
APPLICATION: THQ-PC701 Wireless Highways, Inc.

Dear Mr. Ward:

Below are the comments that you have provided regarding the application for certification referenced above. Our responses to those comments are in ***bold italic***. Many responses refer you to additional exhibit(s) which has been uploaded to the application folder at the ATCB website.

Thank you for your attention. Please feel free to contact us for any additional information that you may require.

Regards,

Gregory M. Snyder
Chief EMC Engineer, Wireless/Telco Services Manager

Brian J. Dettling
Documentation Specialist

WLL Project: 8837

1) Please note that the manual does not appear to provide the required rf exposure statement requiring a minimum 20 cm separation between the antenna and the user. Please provide this statement in the manual.

R. The manual has been modified to include the needed statement. Please see page 44 of "PC701 User Manual Rev .1"

2) Please note that the test report states the device has an N-type antenna connector, but the manual states it has an SMA type. The photos appear to show an SMA. Please also note that it is not clear if the rf connectors are unique or if the device requires professional installation. Please clearly identify the actual antenna connector involved and please make all documentation consistent with this description. Also, if this device is professionally installed, please clearly indicate this in the user manual.

R. The test report has been modified to show the correct connector type. The unit is professionally installed as indicated in the letter (exhibit “PC701 Additional Information – Installation”) and the user manual has been updated to include a statement on professional installation.
