Re: 2.933 Statement for FCC ID TKJADV800

To Whom It May Concern,

The FCC ID TKJADV800 equipment requested for certification in accordance with §2.933 *Change in identification of equipment* is:

- 1) Using original equipment already certified and identified as: FCC ID NJIAL250.
- 2) The existing Grant Of Equipment Authorization for the original equipment is dated: 10/07/2004.
- 3) The equipment is identical to the original equipment except for the replacement of antenna connectors with additional antenna connectors and cable as performed by the original equipment grantee. No design changes or changes to the circuitry of the original equipment were effected.
- 4) Based on the additional insertion loss due to 3), the original equipment test results and characteristics to be reported with respect to the transmitter will not be exceeded and will be provided with additional margin. Hence, the original equipment test results are not degraded and continue to be representative of and applicable to this equipment.

Yours truly,
