

MPFree Music Transmitter Instruction Manual

Main features:

- *This is an FM transmitter to send audio from music players to FM radios.
- *It comes with a short adapter cable to plug into 3.5mm stereo sockets.
- *It works at the frequencies 88.1, 88.3, 88.5 and 88.7MHz.
- *It has a row of 4 buttons on the front to indicate what radio channel is on.
- *Powered by 2x AAA dry batteries.
- *Transmit distance: 5m

Description:

Connecting with all iPod models, PSP, Mp3

1. Insert 2pcs AAA battery into the battery compartment
2. Insert the supplied connection cable into FM transmitter
3. Insert the other side jack into the headset plug for MP3 player
4. Press ① to turn on the power, and hold ① for 3 seconds to switch off the power.

Listening to music

1. Turn on FM stereo (or any other stereo on which you would like to hear your MP3 player music), frequency 88.1
2. Turn on FM transmitter, row on frequency to be 88.1
3. Turn on your MP3 player and push Play button

Important safety information:

1. We suggest to use high quality dry alkaline or equivalent battery.
2. Once battery low, the sound quality will be affected. As well, it will be more difficult to cover a radio station who disturbs the same frequency. As a result, the sound will not be clear enough.
3. In case of car usage, the sound quality also depends on speed. On an average 90 Km/h speed, there is no problem found. In case of higher speed, there might be some noise caused by difficult transmission.
4. There is an antenna inside the plastic case. It's very important to handle the unit with care because the antenna can be easily damaged. Also, when the unit is in the hand, there is a human body antenna effect, so the sound could be modified in case the unit is separated from human body. It's a natural Effect which cannot be modified.

Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications not authorized by the manufacturer may void user's authority to operate this device.
