FAX: 0086-592-5590755

**Cover letter**

We would like to confirm hereby that the access panel on the front of the equipment has been modified. It is stick down by hot glue. The access to the crystal is not permitted to the User. The equipment can only use the crystals manufactured by QPE crystals whose frequency band is 72.11~72.99MHz. It is not permitted to use other manufacturers' crystals. And the equipment will not be triggered by crystals in other frequency band (except for 72.11-72.99). The removal or changing of the crystals only can be executed in our maintain centers.
