

A black rectangular electronic device, possibly a power supply or a control unit, is shown against a light gray background. The device has a matte black finish. On the top edge, there are several metallic components: a threaded metal post on the left, followed by two pairs of metal terminals, and another threaded post on the right. A blue rectangular label with a subtle horizontal gradient is affixed to the front face of the device. The label contains the text "LABEL LOCATION" in a black, sans-serif font. Below the label, a small, dark, V-shaped component is visible, which appears to be a cable strain relief or a mounting bracket. The overall image is a clear, high-resolution photograph.

LABEL LOCATION
