CAUTION

Any changes of modifications not expressly approved by the grantee of this device could void the users authority to operate the equipment.

I. Part Names, Functions and Battery installation of the Body Pack Transmitter (AUT210):

1.Part Names and Functions

- ②① Power Switch of the Transmitter
- ②② Power Indicator of the Transmitter
- ②③ Infrared Wire Interface of the Transmitter
- ②④ Volume Control
- ②⑤ Volume Lock
- ②⑥ Strap Clip
- ②⑦ Lavalier Microphone Jack
- ②⑧ Battery Cover

2. Battery Installation

- Press the Battery Cover ⑳ outward as indicated by the embossed arrow to pop open the battery compartment.

- Insert the batteries. (Pay attention to the correct polarities). Cover the battery cover in the direction of the arrowhead in the diagram.

- Close and slide the battery cover back to the locked position.

(Diagram 1)

II. Operating Instruction of Bodypack Microphone (AUT210):

- Battery Installation(As in Diagram 2)
- Adjust the power switch of the microphone ㉔ to ON and at this time the indicator ㉕ will light. When it is in green, it means working properly. You can use the system right now.
- Switch the microphone ㉔ to ON. If the indicator ㉕ is flashing. It means the battery is out of power. Please change the battery on time.

- Switch the microphone ⑳ to ON. If the indicator ㉑ is in red. It means the channels of the transmitter and the receiver are not the same. You need to change them into the same.
- Continuously press the button label "OK" for 3 seconds. " 👁 " will appear and flash on the screen. Release pressing "OK". The receiver will go into Auto-Searching Status. The buzzer will sound continuously when the receiver has found an open channel.
- After the receiver's channel has been selected above, and the receiver is still buzzing, hold the Infrared Wireless Interface ㉒ of the transmitter several inches from the Infrared Wireless Interface ④ of the receiver.
- Turn on the switch ㉓ of the bodypack transmitter and wait a few seconds for the receiver buzzing to stop, which signals the successful programming of the channel selected on the receiver into the transmitter

III. Main Specifications of the Transmitter AUT210:

Type	BodyPack Transmitter (AUT210)
Power	DC:1.2V or 1.5V ×2
	Two "AA"Battery (alkaline)
RF Output Power	6.3mW
Harmonic Emissions	>50dB
Battery Life	About 25 hours ※
Dimensions	66mm×23mm×91mm
Weight	80g(without battery)

UHF Wireless Amplifier

Tips To Obtain the Best Results

- Use only the fresh alkaline batteries. Do not use “general purpose” (carbon-zinc) batteries.
- Turn the transmitter off when not in use. Remove the battery if the transmitter is not to be used for a period of time.
- A receiver cannot receive signals from two transmitters at the same time.
- The power switch on the transmitter has three positions: “ Off ”, “ Standby ” and “ On ”. In the middle “ Standby ” position, the transmitter sends only RF to the receiver; the audio source is turned off.
- Turn the transmitter off when not in use. Remove the battery if the transmitter is not to be used for a period of time.

One-Year Limited Warranty

This system is hereby limited to one year warranty from the date of purchase from us. Consequential or incident damages resulting from a breach of any applicable express or implied warranties are hereby excluded. This warranty is in lieu of all other agreements and warranties, general or special, express or implied and no representative or person including distributor, agent or employee is authorized to assume for us any other liability in connection with the sale or use of this product.
