## No simultaneous SAR justification

Per “ 447498 D01 Mobile Portable RF Exposure v03r01” , EUT complies with following condition:

- 1) Distance between WLAN and Bluetooth antenna is  $11.5411\text{cm} > 5\text{ cm}$
- 2) Max output power of WLAN and Bluetooth are  $< 60/f(\text{GHz})$

Mode	Conducted power ( dBm )	EIRP( dBm )
WLAN	11.14	13.34
BT	1.48	1.98

Accordingly, simultaneous Transmission SAR is not required for this EUT.

WLAN ↔ BT = 115.411mm
