

# User's Manual

**This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions:**

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.
- (3) This device can automatically deactivate the transmitter within not more than 5 seconds of being released.

## **Caution:**

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## **The Device Data:**

1. Model designation: WR-01
2. Power: 12V battery
3. Frequency: 433 MHz

## **Operation instruction:**

Step:

1. Switch on the call unit by on/off control.
2. Put the call unit away from the remote control unit up to 150 feet
3. Select and push a sound button on the remote control unit. The LED on the remote control will light indicating that the remote control is working when a button is pushed. The remote control will not work if two or more buttons are pushed at the same time.
4. The call unit will sound when the button on the remote control unit is pushed. Once the button is released the sound will not stop until the sound cycle ends.
5. The volume of the control unit is controlled by the "Vol Up" and "Vol Down" buttons on the remote control unit. The LED light will light to show that the remote control unit is working when a button is pushed
6. When finished using the remote control unit, do not forget to turn the call unit off.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
