Notice#1

Question #1: The block diagram indicates the device uses 120MHz PLL, but the test report indicates radiated emission test was investigated upto 1GHz only. Based upon FCC15.33(b)(1), however you need to test upto 2GHz. Please explain.

Question #2: This is a hand-held device. The test report does not show radiated emission test was done in three orthogonal planes to find maximum emission. Please explain.

Best Regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
