Operation　Nier iRock

when you first use, please connect the adapter with Nier iRock to

charging .please refer to　"connect the adapter to charge for Nier iRock"

一、turn on/off

In shutdown state, please click the power button, then the Bluetooth indicator light , when you hear four "beep beep" rising tone. ,The System have turned on..

In boot states, please click the shutdown button, then the Bluetooth　indicator light are power off (if it is charging, the charge indicator　light), when they hear four "toot toot toot toot" fall tones, the system have turned off.

二、work　mode

Nier iRock provide two operating modes, bluetooth mode and AUX mode.

1、 Bluetooth mode

（1）Bluetooth **pairing and connecting**

Nier iRock is default in bluetooth mode after boot, when you hear "beep" sound it is enter into the pairing connection status automatically, the bluetooth indicator light blink, at the same time ,only you need to open the Bluetooth function of the smart devices (such as smart phones , tablets, etc.) to search the bluetooth devices, ,please click "Nier iRock" to pairing and connection in the paired device list. when you hear "du............" Long tone, it paired succeed ,the bluetooth indicator light long time. If you don't search to the device within 1 minute ,Nier iRock enter into standby mode, bluetooth indicator light long time. If you need to pairing again ,please click the bluetooth model button, the bluetooth lights will blink, and then it enter into the pairing. When you used for the first time, it is enter into the pairing status directly after boot. if it has pairing to other bluetooth device, it will search in memory device information to pairing after boot, please refer to 《the device pairing information storage》. If you need disconnect it, please close the bluetooth function of Bluetooth device, when they hear "du du..." Sound ,it have disconnected (note: if you need pair password ,please enter "0000")

(2)NFC (Only Receiving) pairing and connection

When the System in bluetooth mode and it is disconnecting , you only need open the NFC function of the smart devices, and lightly touching the device into NFC connection parts of Nier iRock. At the first connection ,it will be prompted "whether you paired with a bluetooth device" click "yes", and then it can be enter into fast pairing and connection automatically , without complex operation. when you hear "du..." Long tone ,it paired succeed, you can be wireless play music.

(3) the Bluetooth wireless music player (with mobile phone as an example)

After the success of the bluetooth connection, please open the music player of your mobile phone ,and then it can be wireless play music by the native. Short or long press the volume + / volume - ,it can be adjusted volume, when the volume up to the max, you will hear a "drop......" sound(AUX mode is unavailable), it said the volume is adjusting to the largest. Fast Double-click the volume + / volume - ,it can be changed between the next song/pervious song (note: the AUX mode is unavailable).

click on the bluetooth button, it can be exchange between the play/pause. (for the operation of other Bluetooth device ,please refer to mobile phone connection operation, different models may different) .please click "mute" button, the system will be silence. The mute mode light will be flash.

2、AUX work mode

In boot state, click the AUX mode button turn to the AUX working mode, when you hear a "beep" sound ,it enter into the AUX mode, AUX status indicator light. If you need turn into Bluetooth mode, please click the Bluetooth button. One end of the audio connecting line is connected to the AUX input interface of Nier iRock, one end is connected to the audio output device (mobile phone, computer, CD or other audio output device) it can be play audio of the audio output device . For the operation of Volume adjustment, please refer to the operation "Bluetooth wireless music player"

三、 Device pairing information storage, state memory function

1、Device pairing information storage: the device information pairing with Nier iRock will

be stored in memory, when the next boot, it will be fast search the devices in memory storage within first 3 seconds, and it will be connected automatically. If there have no found the paired device within 3 seconds ,it will automatically enter into the pairing status .

2、Clear the pairing information storage: after boot and in the state of bluetooth disconnect (if you have connected bluetooth devices, please disconnect) please press the volume + volume -more than 6 second at the same time, when you hear "beep" sound, it cleared succeed, and it is in standby mode. (hint: it is available only in the bluetooth mode, and it need to enter into the pairing state or in the standby)

3、State memory

3.1： Please boot again after shutdown in the boot state, The systems is open by default, in

addition to the volume state of memory Bluetooth mode.

3.2： **when boot**, if you connect the AC adapter to charge, the device will

be restored, and memory the state before restoration to restart, and then restore the reset state . Please refer to charging power management-"reset"

四、 power management

1, Connecting the charger to charge for Nier iRock: please use the attached charger to connected 120VAC socket, output is connected to the Nier iRock charging interface for charging, charging status indicator light green, if it is full ,the light blue, and the normal charging time is 2 to 3 hours.
2. The charge reset: in the switched on , if you connected to the charger, the device will be restored to restart, and it will reset before the reset state . In the shutdown state, please connect the charger , the device will still in shutdown state .

3.Smart power-saving: in order to save electricity, when there have no audio playing, the

system will automatically shut down after 15 minutes
4.Low battery protection: in order to correct use and maximum extend the battery life, our machine is designed for the battery protection function, when you hear "dong ding dong

ding dong" sound, the charging status light red, it said the battery is insufficient, and then the system will automatically turn off after 30 seconds, please charge for Nier iRock urgently . when the electric power is full ,it normal use 8 to 10 hours. (specific use time related to the volume on the work)

5.USB power output: USB output interface provide DC5V / 1 power source, it can be charge for the mobile devices. (connect the charger ,charging status and switched on, they are effective)
