II. J-310M **Charging method**

1. Charging information

- It takes at least 6 hours when you first charge the battery.
- When the LED of the headset is flashing RED, the battery is low.
- When LED is not lit, the battery is dead and no calls may be made.
- Please only charge when the battery is low, and do not stop charging until the battery is full. Please follow the correct charging method to give your battery a longer life. Not following these guidelines will invalidate your warranty.

2.Charging Steps

Connect the charger cable to the charger connector on the headset

CHARGER SOCKET

- **Please take out the MINI USB charger in the package and plug into the MINI USB port on the headset.**
- **LED will be red flashes during you are charging.**
- **When the battery is full, LED will be permanently red**

Battery information

Please read and follow the information and user's manual for your reference

- Always try to keep J-310M between -20 to +55
- Do not place this product in strong direct sunlight or extremely hot or cold temperatures.
- Please keep the product away from humid conditions. Do not get it wet.
- Leaving the headset in hot or cold places, such as a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery.

III. J-310M Operation Guide(Function key table)

Each button on the headset performs a different function depending on how long it is pressed by the user.

Instruction and key definition	Duration
TAP	Press briefly
PRESS	Press for approximately 2 seconds
PRESS and HOLD	Press for approximately 3~5 seconds
BT1 Bluetooth pairing mode (multi-compatible) ***Note1**	Press until hear a beep. Green and red LED quick flash into **BT1** pairing mode.

11. Call Transfer (hands free) - P.5 Note 2 for your reference

During talking, PRESS Answer/End button until 2 beeps are heard then release. The current call will be transferred between the cell phone and the headset.

12. Mute

PRESS VOL down until two beeps are heard and release, the MIC (AD signal) path will be muted. The user's voice will not be transmitted to the remote cell phone. RED LED lights up in mute mode.(To lift the Mute function, repeat the action again)

13. Wearing the headset

The design of Wireless Headset is very flexible and convenient.

The factory defaults and the instructions in this manual are for wearing the headset on the right ear. You may experience a little discomfort on first use, which will disappear as you become accustomed to using it.

Follow these steps:

1. Pull the ear hook so that it is perpendicular to the headset as shown in the figure below.
2. Loop the ear hook behind the ear as shown, and press the headset to the ear.
3. Point the microphone to toward the month.
4. Adjust your ear hook until it suits your ear.

Wearing the headset on the left ear

If wearing the headset on the left ear is preferred, the ear hook to the other side of the headset is easily adjustable. Refer to the figure below.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
