

Operation description:

The transmitter is supplied from low voltage.

The signal flow is as below:

For transmitter:

1. Left and right audio signals input to transmitter
2. stereo mixer process
3. frequency-lock control and signal amplified
4. transmitted by antenna

Two frequencies: 912MHz and 913MHz.

For transmitter, red LED indicates power on while blue LED indicates signal on.

The Transmitter contains 2 modules: TXB, TX
