Hi Daphne :

Based upon the bandwidth plots, I do not think the measurement was made with audio modulation. Please submit 20 BW plots with iPod tuned to max. volume and measure low, middle and high 20 dB. The spectrum plots must show two traces, one with audio modulation and one without audio modulation.

Question #1: Please explain in detail on the operating condition during the final tests. Per ANSI C63.4 section 13.1.1.1 applied modulation, the device equipped with any input connector to for external modulation, then the device must be tested with modulation on. For this FM transmitter, the purpose for the transmitter is to modulate audio signal to car radio. In this test report, no information is provided to address modulation condition.

**Ans: Sorry for confused you. Please find the updated test report(1227) with add some datas in**

12/29/2005

And also add the new photo with iPod.

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
