

Mr. Madlangbayan:

In order for processing of this application (FCC ID: TWE-SM1X00-XXX) to continue, the following issue(s) will have to be addressed:

- 1) The following items described in the operational description of the device do not correspond to the measured parameters. The frequency range described in the application and test report is 903.5 MHz to 923 MHz, but is listed in the operational description as 902 MHz to 925 MHz. The maximum measured RF output power was 6.16 mW, but the operational description states 16 mW. Please clarify the actual transmitter parameters; and submit either a corrected operational description, or new test data for the wider frequency band and higher power output.
- 2) The user's manual and installation instructions must contain the following RF hazard warning:

"CAUTION: To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons."

Please submit a new users manual and installation instructions.

- 3) Since the device was modified, please submit a letter from the manufacturer, attesting to the fact that the modifications will be implemented into all production models.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is TWE-SM1X00-XXX-1.

Best regards,
