INSTRUCTIONS FOR THE REMOTE CONTROL

First, place the batteries into the remote control. Then you can use remote control to operate the DVD video player

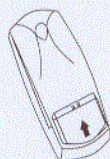

- ✎ Open the battery compartment.

- ✎ Insert the batteries, make sure to match + and - of the batteries to the markings in the battery compartment.

- ✎ Close the battery cover.

NOTE: Improper use of the batteries may cause battery leakage and corrosion. To operate the remote control correctly, follow the instructions below:

Do not insert batteries into the remote control in the wrong direction.

Do not charge, heat, open or short-circuit batteries. Do not throw batteries into a fire.

- Do not leave dead or exhausted batteries in the remote control.
- Do not use different types of batteries together or mix old and new batteries.

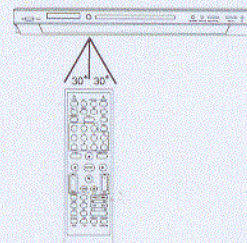

For a long period of non-use, remove the batteries to avoid possible damage from battery corrosion.

- If the remote control does not

function correctly, or the operating range becomes reduced, replace all batteries with new ones.

- If battery leakage occurs, wipe the battery liquid from the battery compartment, then insert new batteries. The batteries can be used for one year in normal conditions.

Operation of the remote control

Distance : within 7m from the front of the remote control sensor.

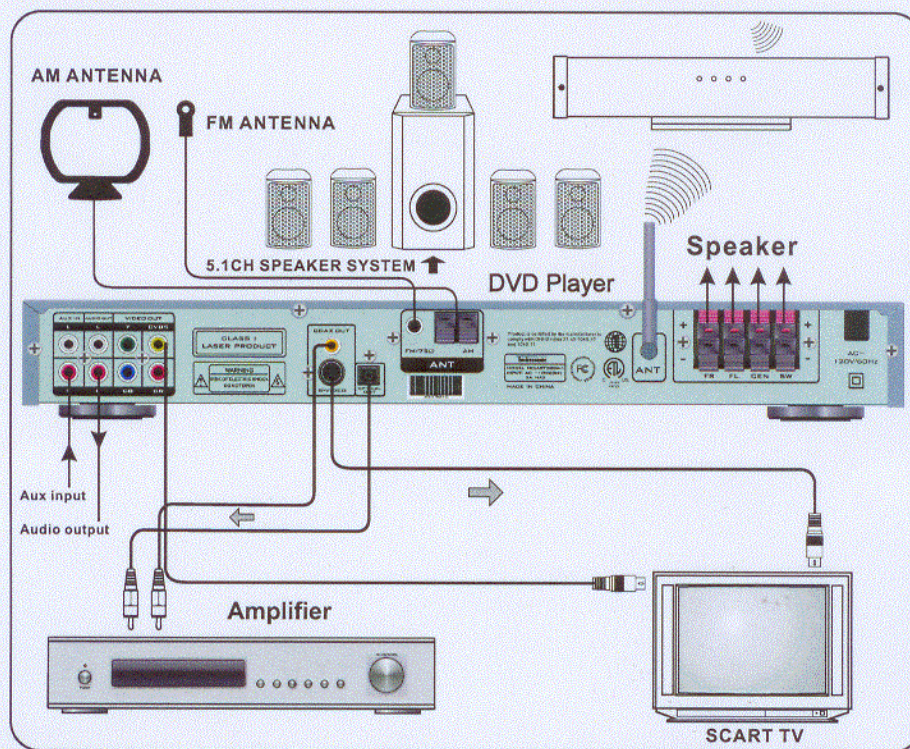

Angle: within 30° in each direction of the front of the remote sensor.

Do not expose the remote sensor of the DVD video player to a strong light source such as direct sunlight or other illumination. If you do so, you may not be able to operate the DVD video player via the remote control.

Notes on the remote control

- ⊗ Direct the remote control at the remote sensor of the DVD video player.
- ⊗ Do not drop the remote control.
- ⊗ Do not put heavy object on top of the remote control.
- ⊗ Do not spill water or any liquid on the remote control.
- ⊗ Do not open the remote control.

SYSTEM SETUP

OUTLINE OF AUDIO /VIDEO CONNECTIONS

The receiver is provided with two analogue and two digital audio/video inputs. The receiver shall not be connected to the mains supply before all other system connections have been made.

The DVD player is connected through the digital inputs (optical or coaxial).

The video signal is transmitted to the television set through the SCART connection.

It is also possible to transmit the audio signal from the television set to the receiver through the SCART connection. This will allow you to watch films with Dolby Surround sound if the films are coded.

CONNECTION THROUGH DIGITAL AUDIO/VIDEO CABLE.

The coaxial or optical output for DVD player must be connected with the corresponding digital input on the AV receiver (OPT/COAX). Make sure to use the corresponding video input! Switch to the corresponding signal source by the INPUT key.

Most DVD player with digital outputs are factory-set at the analogue format.

Make sure that the DVD player has the same configuration under setup.

The video signal may also be transmitted directly from the DVD player to the television set.

CONNECTING SPEAKERS

Speaker connections:

Note: Make sure that the unit is unplugged when you connect the speakers. To connect the speaker cords to the speaker terminal, the colored lever has to be pressed until the terminal opens. Insert the bare wire into the terminal opening and release the lever. See illustration below.

Mark sure that the terminal closes on the bare wire, not on the plastic insulation.

The wires and terminals are all colored for easy connections.

1. Connect the left and right front speakers to the front terminals in the back panel.
2. Connect the sub-woofer speakers to the SW terminal in the back panel.
3. Connect the center speaker to the CEN terminal in the back panel.
4. Simply connect the surround left and right speakers power cord to the AC jack. There is no need to connect the speakers cable, since these speakers are wireless.

Note:

Make sure the speaker wires are connected to the rear panel of the unit as shown. Use only the speakers which are supplied with this unit.

CAUTION:

Ensure that the polarities of the speaker wires RED(+) BLACK(-) are connected to the speaker terminal correctly.
