Maximum Target power of WLAN/ BT

<u>TX Power Setting</u>

- Each product is programmed with the pre-defined RF parameters
- Each product RF power level is measured to ensure the power level not exceeding the target power level, in a fully calibrated setup.
- The user has no possibility to change these settings later on

Please find below the **Maximum** Transmit Power for production units:

Maximum Target Average Power				
Freq (MHz)	11b	11g	HT20	HT40
2412	16.5	15	15	
2422				15
2437	16.5	16.5	16.5	16.5
2452				15
2462	16.5	15	15	

Power unit: dBm
