## Operational Description

RF parameter cannot be changed by driver, firmware, and software. RF parameters are read-only for these software.

The method the change HW parameter is not open to public and is only used by mass production in factories.

There is specific configuration process for RF. If RF is not configured by correct process, it will not work at all. This configuration process is private info of Realtek and only implemented in Realtek driver. No other parties can get this information.
