ADVICE :

- + In case of warning siren you have heard from the pager or CH-960G, do not go to your vehicle directly.
- + For safety reason, please make sure there are no thieves around your vehicle or make emergency call for help.

The following is contained ways for how to use CH-960G steering wheel lock.

+ Due to our safety goal, please comply with following steps while you operate.

Please read this manual book carefully before operating the steering wheel lock. WARNING and ATTENTION are very important parts of the operating.

+ We are not responsible for any damage/injured of vehicle or person if the user not obeys the following instruction.

WARNING

LOCK

+ Installation

- Lock on the steering wheel only.
- Make sure the lock is tight on steering wheel while using.

+ Stop

- Do not swing the lock, it might damage the product or injured people.
- Do not start your vehicle until you remove the CH-960G from your steering wheel.
- Never attempt to start or drive your vehicle with CH-960G locked onto the steering wheel.
- Do not separate or modify the lock for other purpose : the lock is made by precise material, you might get shock or damage the lock by separating or modifying the lock.
- We are not responsible for any lock damage if the lock is modified or separated.

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE □ MAY NOT CAUSE HARMFUL INTERFERENCE AND (2) THIS DEVICE MUST □ ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE □ THAT MAY CAUSE UNDESIRE OPERATION.□

Notice : The changes or modifications not expressly approved by the party □ responsible for compliance could void the user's authority to operate the □ equipment.□

LOCK

+ Way to use

- Remember to keep your hands away from the metal bar while you unlock the lock, it might be heated by sunshine at the day time : touched the foam rubber bar first is suggested.
- Always remove the lock before starting vehicle; otherwise, it might distract driver attention and cause accident.
- Remove the CH-960G from steering wheel and store it out of the way. Be sure it won't interfere with any pedals or levers while not in use and is secured from movement in the event of a sudden stop or accident.
- CH-960G is operated at inside of car only : do not use for other purpose.
- We are not responsible for the lock damage of moisture.

+ Maintenance

- Dry-rub the lock with cotton cloth for cleaning, CH-960G surface might be damaged by alcoholic cleaner.

PAGER

+ Way to use

- Always keep the pager dry , we are not responsible for damage of pager in wet or moisture.
- Dry-rub the pager with cotton cloth for cleaning only.

BATTERY

- Heating and separating used battery are prohibited, it might cause fire or explosion.

PACKAGING

ITEMS :

CH-960G Steering wheel lock × 1

Keys × 2

Receiving pager × 1

Manual book × 1

Spare screws × 3

LOCK :

- ▶ Lock cylinder is for unlock only.
- ▶ Hooks will be opened While you unlock CH-960G.
- ▶ LED indicator will be flashing once every 5 seconds while CH-960G is armed.
- ▶ Latch CH-960G upon dashboard tight and force steering wheel immobilizing.
- ▶ Always keep the keys in safe place , we might be unable to offer spare key if keys lost.

- ★ Please contact with our customer service if your CH-960G problems are not in the list above.
 - ★ We are not responsible for any damage by owner's fixing even still under the warranty.

SPECIFICATIONS

CH-960G

Siren volume	up to 110db
Working temperature	+80 to -40 of Celsius
Pulling strength	up to 4,500 kg (metal bar)
Cutting strength	up to 5,000 kg(metal bar)
Electric shock test	up to 200,000 volt
Surface hardness	HRC 60 degree upper
Size	180 × 370 mm
Weight	1,400 gm (battery no include)

PAGER

Power	1.5 volt
Range of receiving	up to 1,200 M (with no interfering)
Size	64 × 31 mm
Weight	30 gm

12 MONTHS WARRANTY BY MEGACELL
