Class II Permissive Change Letter

December 11, 2007

Chief, Authorizations Branch
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Re: WiQuest Communications, Inc. FCC Class II Permissive Change Application
FCC ID: TZQWQ110MC

To Whom It May Concern:

The intent of this letter is to request a Class II Permissive change for FCC ID: TZQWQ110MC, originally granted on 11/5/2007.

WiQuest Communications Inc. has implemented a BIOS Lock mechanism for products that ship under FCC ID: TZQWQ110MC. The BIOS Lock mechanism addresses the following:

- Prevents the module from functioning in an unauthorized system
- Prevents a module from being moved from an authorized system to an unauthorized system
- Allows the module to function properly in an authorized system

The change filed under this application requests the removal of the following limitation from the grant: "This device must be installed by the OEM integrator. User installation is prohibited."

No other changes have been made to the Transmitter Module.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jovica Jovanovski".
