

A D T

OPERATIONAL DESCRIPTION

This device is a Wireless AP/CB, which operates in the 2.4GHz frequency spectrum with throughput of up to 54bps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by POE. The antennas are Internal antenna (Patch) without antenna connector and External antenna (dipole) with RSMA antenna connector.

For more detailed instruction, please take a look at the user's manual.
