To Whom It May Concern:

This letter is intended to provide clarification for a picture of our product where shielding appears to be present. The picture of concern shows two areas that appear to be shielded.

The device near the top of the board is a super-capacitor that is enclosed in metal to allow mounting to the electronic board. The device located at the bottom of the board and labeled Trimble is a self-contained GPS receiver module that we use as a component on the board. This component would be destroyed if the shielding cover were removed (i.e. like a Voltage Controlled Oscillator).

Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'T. E. Lucas'.

Thomas E. Lucas
