Re: Response to Request for Additional Information for EMC Certification regarding RMB-2000 series.

The 'Module PIN' referred to in the subject request is Pad # 43 (RFOUT) on the RMB-2000 and RMB-2001 models. This pad is intended for attachment to the Planar Inverted F Antenna (PIFA) described in the manual. The PIFA was evaluated as part of the compliance testing and the results are included in the report.

In all four models (RMB-2000, RMB-2000U, RMB-2001, RMB-2001U) the internal RF configuration is the same.

Sincerely,

A handwritten signature in dark ink, appearing to read "Philip Buonadonna", with a long horizontal flourish extending to the right.

Philip Buonadonna
