

OHIO WILLOW WOOD®

December 27, 2007

To whom it may concern:

The Ohio Willow Wood Company (OWWCO) radio module, FCC ID U3V6221020, has been tested with a wall charger that includes a ferrite molded into the charger cable. This family of products uses charger connections that are not readily available to users and as such can only be used with chargers supplied by OWWCO. OWWCO will retest any design that uses a module and a line supplied power supply other than the model used for the current application.
