Subject: RE: Class II permissive change - Shanghai Nine Eagles

Hi Nick,

I have made the related papers. Please refer to it.

As for the EUT is smaller than the hand, the statement was not included in the ID label but in user manual instead.

I wish the Grant can be issued soon. Thank you a lot.

Best wishes

Wakeyou Wang

Wakeyou,

I hope you have been well since we last spoke. I have had a chance to review the Permissive Change filing and have the following comments:

1) The external photos show that the enclosure has changed in shape. Please submit a new label exhibit, showing the text and placement of the FCC label with the two-part interference statement on the new enclosure.

2) Please submit a new user manual exhibit.

3) The internal photos show that the PCB layout has changed significantly. Please submit a new schematic exhibit.

Applicant Response 2-11-2009.txt

4) The test data provided looks promising, but is incomplete with the test stopping at 1 GHz. The fundamental and the harmonics should be measured to show that they have not changed, and the full frequency range of test for a 2.4 GHz transmitter should be investigated for emissions.

Best Regards,

Hi Wakeyou,

Nick will handle the application.

Nick,

I will have the file on the network for you today. Can you give Wakeyou a timeframe?

Regards,

Terre

Hi Terre,

Happy New Year!

This case is for Class II permissive change. Please help to give an arrangement.

Thanks!

Best wi shes
