Label Requirements

Company: Assa Abloy, Inc.
Brand Name: Yale
Model Number: YRMZB2
FCC ID: U4A-YRHCPZB0FM

The modules may be purchased separately. They will only work in Yale Real Living locks however, and the end user has the choice as to which module they decide to use with their lock (ZWave or ZigBee).

In some instances the module will be installed at the factory. Other instances the module will be placed in the box and the end user will install it during installation of the lock. There is also the possibility of the end user purchasing a module separately to use with a Yale lock they may already have.

End users have straightforward commonly used methods for access to remove the module such that the FCC ID of the module is visible.
