

1. Radiated Emissions

A portable computer workstation is set up outdoors on a white folding table. On the table, from left to right, are a black laptop, a small black power supply unit, a black power strip, and a black and white computer mouse. Several black cables are connected to the power strip and are bundled together. To the left of the table, on the grass, is a large black power cable reel with a silver handle. A black cable runs from the reel to the power strip on the table. The entire setup is on a grassy field.
