Page 4: Charging your headset: include lineart showing the headset charging on the dock.

Page 5: Charging your headset

Connect your headset to the charging dock and plug the usb charger into the dock input.

Nominal Charge Time

The battery is normally fully charges within 3 hours. When the battery is fully charged, the LED will turn blue and remain on for 30 minutes. Disconnect the headset from the dock to stop charging. Press and hold the MFB for 2 seconds to turn the headset on, please refer to “turning your headset on and off” on the next page.

Talk & Standby Time

The fully charged battery offers up to 6hours talk time and up to 150 hours standby time when no calls are in progress, the headset remains turned on in standby mode.

Low Battery

When the headset is on and the battery becomes low, the LED flashes red. Please recharge the battery as advised above.

Keep Built in Battery

Do not attempt to replace the headset’s battery yourself as it is built into the headset and is non-changeable.

Page 16: Trouble Shooting

If you are unable to connect your headset and mobile headset, please try the following:

Ensure your headset is turned off and is properly charged

Ensure the headset is paired with your mobile handset

Ensure the headset is within a 10 meters range of your mobile handset(s) and there are no obstructions, such as walls or other electronics devices in between.

If the above steps do not solve your problem, please recharge the headset and remove your mobile handset battery for a short time.

If there is no reaction when pressing the buttons press and hold both the “V+” and “V-” buttons for 10 seconds. The LED will flash Blue and Red alternately with 0.3 seconds each.

Release the buttons.

Press and hold both the “V+” and “V-” buttons again for 3 seconds. Two beeps (0.5 seconds on/off) sound.

Headset will be shut down automatically, and headset will be restored to default setting.
