360° Laser/Safety/Radar Detector
Model EWR - 757

Printed in China

Manufactured For Early Warning™
BG Tech America, Inc.

CONGRATULATIONS!

Thank you for purchasing the Early Warning Radar Detection Model EWR-757, World's most sophisticated radar/laser/safety detector.

The Early Warning radar detector is the only completely self-contained radar/laser detector that responds to the X, K, and the Ka Superwide radar bands in use today, including Pro Laser 1, 2 and 3, LTI 20-20, UltraLyte, Stalker LZ-1, and Laser Atlanta L-1.

Enjoy your new detector and be sure to obey **all** laws wherever you may travel with the Early Warning Radar Detector.

Please drive safely!

A radar detector is not a license to speed, it is designed to help safely drive within the confines of today's ever changing speed limits. Always drive safely and carefully observing the speed limit at all times.

Federal Law Governs the Use of Radar Detectors. It is not against federal law to receive radar transmissions with your Early Warning™ radar detector.

The Communications Act of 1924 guarantees your right to receive radio transmissions on any frequency. Local laws that contravene this Act, while illegal, may be enforced by your local law enforcement officials until and unless they are prohibited from doing so by federal court action.

* FCC STATEMENT *

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.
