

SRS-200BM
User's Manual
(Bluetooth Mono Headset)

Safety Notices

- Prior to use, please read "Bluetooth Mono Headset user's manual", carefully for its instructions and notices and use it appropriately.
- Please follow the instructions in order to prevent user's risks and property damages.

Warnings

- Please do not damage the headset with a sharp object. (such as nail, knife and scissors)
- Please do not wet or soak headset in water.
- Please do not let childrens or pets bite or suck the headset.
- Please do not touch product with a wet hand.
- Please do not use other battery chargers other than the battery charger provided.

Cautions

- Avoid the direct ray of light or a hot and humid place. (e.g., spa and sauna)
- Do not put in or near a thermic appliance such as heater and microwave. (Doing so may distort the product or result in explosion or fire.)
- Do not use the product near a microwave or wireless LAN. (The electromagnetic interference between products using the same frequency may result in malfuncutuon or noise.)
- Turn off the product before storing, and keep it away from places with high temperatures of more than 50°C, under direct ray of light, or inside a hot vehicle. Keeping it in high temperature may cause dagradation of the performance and reduce the durability of the battery.
- Please do not drop or shock the headset.

- Please do not rebuild, disassemble or repair the headset arbitrarily. If rebuilt, disassembled or repaired arbitrarily it will be not able to receive any free repair service.
- If you are calling at a high volume for a long period of time, it may damage your hearing.
- If you hold the product with your hands too tight, the voice quality may be degraded.
- Please do not use this headset while you are driving. If its use is inevitable, please follow the related laws and regulations and make your conversation as short as possible.

 **Cautio**

Since the Bluetooth Mono Headset has a possibility of bad connection, it shall not be used for the services directly related to safety.

■ **Introduction**

Wireless Mono Headset, developed with the Bluetooth technology, has the following primary features.

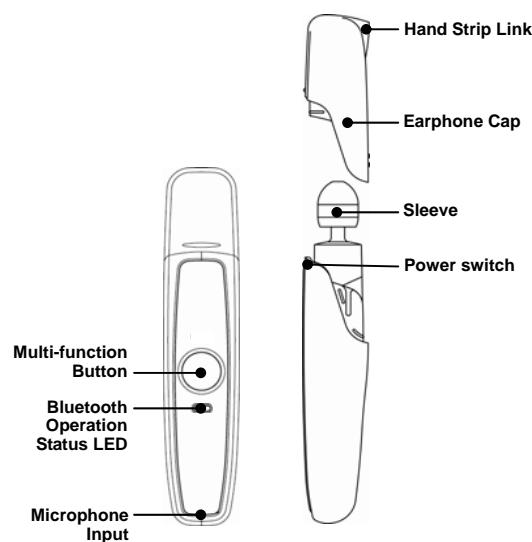

- Wireless Mono Headset
- Wireless Handsfree

■ **Package**

- After purchasing, detach the BD_Address/serial number label from the product, keep it attached to the blank of the warranty (required for the after-sales service.).

Features

■ Before Starting to Use

Preparations

- Please read the instructions carefully before its usage.

Charging

- The product includes a built-in battery. Please charge it with the DC charger provided in the box.
- After purchasing this product, please charge the battery fully before using it for the first time.

- Please charge the headset until the indicator turns from Red to Blue.
- Do not use the headset while charging.

! Cautio

Please do not charge this headset with the unspecified chargers. It may cause damage and deterioration.

Usage

Turning On/Off the Headset

The headset may be turned on/off by opening/closing the earphone cap.

ON

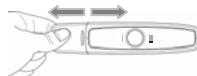

OFF

Wearing the Headset

1 Pull earphone cap.

2 Bend the earphone.

3 Wear on your ear.

Connecting the Headset to a Bluetooth Device

- Connection between headset and Bluetooth mobile phone is made wirelessly through an encoded authentication.

The following registration process should be performed for the initial connection.

1. Set the headset into stand by mode. With Multi-function button pressed, you may open the earphone cap turn on the power. (As the operation status LED flicks in Blue and Red color, stand-by mode lasts for around three minutes.)
2. Search the headset from the mobile phone, referring to the mobile phone user's manual.
3. Select "SRS-200BM" from the searched list.
4. Enter "0000" when mobile phone asks for password or pin-number.
5. Select "SRS-200BM" from the list of registered devices.

* Once registered, there is no need for re-registering for future connection.

* If there is no registered devices in three minutes of register-stand-by mode, it automatically switches to connect-stand-by mode. In this case, turn off the device and try to register from the beginning.

Cautio

Please refer to the User's Manual of your mobile phone for the details about Bluetooth headset connection, registration and deletion.

Calling

Calling to the Latest Number

- Press the multi-function button to check the last call history saved in the phone.
- Press the multi-function button again to call the last number. (Depends on the type of the mobile phone, you may call without saving the call history.)

Calling with a Voice

- Please press the multi-function button for more than 2 seconds.
- You can use it according to the sequence of voice calling function of your mobile phone.

 **Cautio**

When the mobile phone supports voice calling function and is connected through a handsfree profile, calls can be placed with a voice.

Calling with a Mobile Phone

- Please call with your mobile phone.
- Check the calling tone from the mobile phone and push the multi-function button on your headset. You can either hear the calling tone or communicate through headset. (In case of the mobile phone that supports an automatic call switching function, the call automatically switches to the headset.)

 **Cautio**

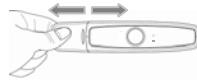

Making a call in a noisy place or outside may cause a difficulty for communication.

Receiving a Call

Since this headset supports the automatic connection function, calls can be automatically received even when the earphone cap is connected to the main body.

Receiving a Call while the cap is closed

- 1 Pull earphone cap.

- 2 Bend the earphone.

- 3 Wear on your ear.

Receiving a Call while the cap is opened

- Please press the multi-function button when the phone rings.

Cautio

When a call is received through a mobile phone, push the multi-function button once for 2 seconds to switch it to the headset talk.
(At this time, the Bluetooth function should be enabled.)

Hanging up the Call

- Please press the multi-function button to hang up the phone.

Refusing a Call

Refusing a Call while the cap is closed

- Please reject the call from the mobile phone while referring to the mobile phone user's manual.
- When the earphone cap is detached from the main body, When hearing a phone bell from the headset, please push the multi-function button for more than 2 seconds.

Refusing a Call while the cap is opened

- Please press the multi-function button for more than 2 seconds when the phone rings.

Call Switching

While having a conversation, use it when switching from headset to Mobile phone or vice versa.

From headset To Bluetooth mobile phone	Press the multi-function button for more than 2 seconds
From Bluetooth mobile phone To headset	Press the multi-function button for more than 2 seconds

Re-connection Function

- * This device saves the information of the connected device, and reconnection of the latest device is possible when asked by the user.
- * Disconnected headset and Bluetooth devices are available for reconnection in 3 minutes, they are automatically reconnected.
- * Then, it should maintain the connection status.

Specifications

Specification	Description
Product Name	Radio Device for Radio data communication System (SRS-200BM)
Authentication Number	FCC ID : U6KSRS200BMA MIC : SLA-SRS-200BM CE0678  0000000000
Bluetooth QD ID	B012702
Bluetooth Specification	Version 2.0
Supported Bluetooth Profile	Headset profile(HSP), Handsfree profile(HFP)
Frequency Range	2.402 ~ 2.480 GHz
Transmission Output	0.1mW ~ 2.5mW
Range	Maximum 10 meters
Operating Temperature	-10°C ~ 50°C
Standby Time	Maximum 100 Days
Talk Time	Maximum 3.5 hours
Battery Charging Time	2 hours
Adaptor Spec	Rated Input: AC 100~240V, 50/60Hz Rated Output: DC 5V
Dimension	SRS-200BM Body (16.6 x 80 x 14.8 mm)
Weight	11g (including Earphone Cap)

Troubleshooting

Problem	Action
The operation status LED is not turned on.	<ul style="list-style-type: none">If the operation status LED is not responding even after turning on the power switch, it is because the battery is discharged. Use after charging it sufficiently.
Device registration can not be done.	<ul style="list-style-type: none">Registration should be made from the user's Bluetooth device after setting the headset to the registration status and turning on the Bluetooth operation of the Bluetooth device. (Please refer to the Bluetooth device usage from the user's manual of the Bluetooth device.)
Authentication code is Not working.	<ul style="list-style-type: none">When connecting between Bluetooth devices, the accurate authentication number should be entered. (In case of this product, the number is "0000").
It has bad connections. It is frequently Disconnections.	<ul style="list-style-type: none">The radio wave is not stable. Please try to use it in another location.It is either under a bad status of receiving radio waves due to an obstacle between Bluetooth devices or by a long distance between them. Please make shorter the distance between two devices.
The battery standby is too short.	<ul style="list-style-type: none">Since battery is a consumable article, its standby time will get shorter from the initial use.The use time can be shorter if the charged product is left in a low or high temperature for a long period of time.
Heat is generated from headset .	<ul style="list-style-type: none">It requires a considerable amount of current while talking. Heat is generated in this process and when talking for a long period of time.You may continue to use since it doesn't influence on the lifetime and performance of the product.

LED Status Indication

Headset Status	LED Indication	Status Sound
