Hi Jennifer,
I am writing you on behalf of my colleague Ricardo Orejas regarding this project (CardioSen`C, FCC ID: U6VCBSENC)

Please find attached requested modified test report as requested by technical reviewer (please check email below of 6th August). I hope it meets your requirements and we can close this FCC approval ASAP.

I am sorry about the delay in getting this report fixed to you, due to our vacations period...

Please keep us updated about when the FCC grant will be issued, as I need to inform the customer.

Thanks

Best regards
Domingo

Hi Sara,

Our technical reviewer has the following concerns:

Please provide RF power levels as measured values (Not 33dBm x 2 or 30dBm x 2) for all setup plots in SAR test report (Please refer RF test report).

Please provide as soon as possible. If you have any questions, please let me know.

Thanks!
Jennifer
