RE: Extended Frequency Justification:  
FCC ID: U89SDB670AC01

To Whom It May Concern:

Team Simoco Ltd would like to submit the following justification to show the frequency range as 150 – 174 MHz on the Grant of Equipment Authorization for U89SDB670AC01 equipment.

This frequency range is applicable to FCC Part 90 radio communication systems that would include federal and public agencies, emergency services, commercial, business and industrial services etc.

These services account for the majority of users on this band (refer to the list below).

Frequency:	Application:
150.050 – 150.800	Federal Government
150.800 – 156.2475	Part 90
157.1875 – 161.575	Part 90
161.625 – 173.400	Federal Government and Part 90
173.400 – 174.000	Federal Government

Also the frequency of operation of the U89SDB670AC01 base station cannot be programmed by the operator to transmit on frequencies other than those programmed by service or maintenance personnel. From the FCC KDB634187 guide, it is noted that FCC rules would be violated if the U89SDB670AC01 equipment were programmed and operated on unauthorized frequencies.

Thank you for your attention to this matter.

Yours faithfully

Richard Stimson
