Subject: Permissive Change

Good morning

Please process this submission as a class 2 permissive change.

It is not really a permissive change rather than an error in the FCC grant however my client and I are running out of patient with the FCC process.

This is the only way that I can see of being able to get the grant changed.

I hoping that this will be a formality as all of the data that I have submitted is identical to the original submission except for the test report where the frequency stability limit has been amended to be +/- 1.5 ppm and the form 731 has been corrected.

As it is a mistake my client will probably not be willing to wear the cost so if you are able to do me a good deal, as I will have to pick up the cost of the certification, this would be most appreciated.

regards

A handwritten signature in black ink that reads "Andrew Cutler".
