Attention: Application Examiner / Review Engineer

Subject: Request for a Class II Permissive Change

FCC ID: U99E WLAN1
Grant Date(s): 05/31/2016

Pursuant to CFR47 §2.1043, the Grantee hereby request a Class II Permissive Change to add a new equipment class to the existing FCC ID as a result of a rule change.

Following changes apply to the modified device:

- The new FCC Part 90Y Band (4940 – 4990 MHz) will be exclusively activated by software, there is no change in hardware.
- The new FCC Part 90Y Band can only be activated by the Grantee himself.
- Enabling the Part 90Y Bands has no influence on the already authorized 2.4 GHz und 5 GHz frequency bands.
- The different HW Version as documented in the new test report compared to the HW version in the original application is caused by adding national authorizations.
- This RF Module (E WLAN1) will not be sold to any third party and will be integrated exclusively by the Grantee into his own end products.

There are no further changes made to the original product. There are no changes made to the transmitter circuitry and the above listed changes result in the same RF characteristics as in the original filing - therefore the not repeated test results continue to be representative of and applicable also to this modified device.

Sincerely,

Sabrina Berghahn
Technical Product Certification Assistant and authorized agent
