

## Remote Control for Ride-On Toy Vehicle

### Operating Instructions

DRAFT Rev 0.1

- When the R/C switch is ON, the R/C green indicator blinks repeatedly to indicate transmission of the “go” signal.
- When the R/C switch is turned off (to its “stop” position), the vehicle will stop.
- When the vehicle gets too far from the R/C, it goes out of reception range. In this case, it automatically stops.
- The actual reception range depends on several factors such as interference from other transmission sources, R/C battery strength or whether the area is crowded. However, the vehicle will stop upon getting out of range. If reception range persistently falls below 10-20 meters, check the R/C battery.
- Always turn the R/C switch off (to its “stop” position) when not in use, to avoid draining the R/C battery.

**NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC ID: UEW-2006-0001 . This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

**Warning!**

Changes or modifications to this equipment not expressly approved by Diamant Toys Ltd could void the user's authority to operate the equipment.
