6. Operating

6-1 Pairing

1 Press the END button for more than 2 seconds.

- The blue LED will flash once a second with a melody.

2 From the handset, search for and register VOSSOR.

- Please refer to the user's manual of the handset.
- Enter "0000" when a pincode(or passcode) is requested.
- when the pairing is completed, the blue LED of VOSSOR flashes every 4~5 seconds with a melody. If it flashes once a second, please try again from the beginning.

Tips

- Once your phone is paired with VOSSOR, it will automatically recognize VOSSOR.

■ Pairing can be done with up to a maximum of 3 handsets. ■

- VOSSOR stores up to 3 different phones in memory.
- Keep in mind that the latest phone number removes the earliest one when the memory is full.
- Priority is given to the most recently paired handset.
- If you want to change the handset priority, try to connect VOSSOR from the handset.
- If the latest paired handset supports handsfree profile, VOSSOR is connected automatically to the handset when the power is on.

6-2 Standard Function

Power on

Turn on the Power switch.

Power off

Turn off the Power switch

Speaker Volume control

- For higher volume, press ▲ button .
- For lower volume, press ▼ button.

Microphone Volume control

In order to increase the volume of the microphone, press SEND and END button simultaneously until you hear the "beep" sound.

- Repeat four times to go back to initial stage.

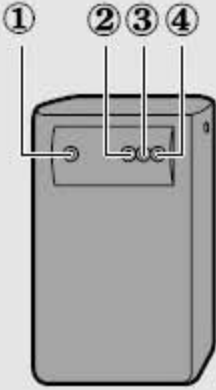

Speaker mute

Double click the Audio Transfer button.

- The speaker will mute after the beep sound is heard. (The sound will still be heard through the earphones.)
- To cancel the mute function, double click the Audio Transfer button.

7. Declaration of confirmation

Class B device

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

[CAUTION]

Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

[FCC compliance Information]

This device complies with part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

[FCC WARNING]

This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.
