

FCC ID: UFJ282200902

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC ID: UFJ282200902

The LumeroTel Transmitter is a Handheld transmitter with FSK modulation at 915.3 Mhz. It is battery powered and has a loop type antenna soldered to the printed circuit board. It is used to activate a receiver/motor control to operate a reversible motor used in window covering applications such as rolling shutters and retractable awnings. It includes an Auto/Manual switch to provide additional versatility when using a receiver that is also controlled with a sun and wind control.
