

FCC ID: UFJ283200902

The AstroTec Transmitter is a wall mounted transmitter with FSK modulation at 915.3 Mhz. It is battery powered and has a loop type antenna soldered to the printed circuit board. It is used to activate a receiver/motor control to operate a reversible motor used in window covering applications such as rolling shutters and retractable awnings. It includes a multifunction timer and sun sensor for automatic operation.
