Microphone

Next / Previous

## Power ON/OFF

---

- Press and hold 'Power/Talk' button for 2 seconds to switch the headset on or off.
- Power ON/OFF voice prompt is "Hello" / "Bye".

## Pairing and Connection

---

- While the headset is off, press and hold 'Talk' for 4 seconds to start pairing mode.
- Once the headset is in pairing mode, select 'UBHS-H5' among discovered Bluetooth devices on the phone. When being connected, voice prompt is "Connected".

## Using EQ effect

---

Note: 2 types of EQ effect are programmed in the order below.

- While in Play / Pause mode, long click the '▶■' button to select the EQ effect of your choice.
1. Normal - No EQ effect is applied.
  2. Bass - enhances low-frequency sound to provide rich and deep bass tones.
  3. Live - Delivers natural and soft sound field effect simulating that of a live performance.

## Easy pairing

---

- 'UBHS-H5' supports easy pairing . When pairing , there is no need to enter the '0000'.
- ※ Host device also has to support easy pairing.

## Connecting the Headset

---

- Connecting from the phone: Among registered Bluetooth devices on the phone, select 'UBHS-H5'.
- Connecting from the headset: Through auto-connect function, the headset automatically connects to the last device it was connected to when powered on.

## Resetting the Headset

---

- In case the headset needs to be reset, press 'Play' , 'Talk' and 'Volume Up' buttons together simultaneously.

## Multi Point

---

- Multi-point enables your headset to maintain an active connection with two mobile phones. This means your headset is ready when you want to make or take calls from either your personal or your work phone.
- Before setting up multi-point mode, at least one other Bluetooth enabled device should be stored in the headset's pairing list.
- The headset will recognize the Bluetooth devices based on priority. By default, the first paired Bluetooth device will be the first priority device and the other Bluetooth device will be second priority.

## How to pairing the UBHS-H5

---

### ■ Computer running Windows 7 :

Note: Before you pair the headset with the computer, make sure the computer is equipped with a Bluetooth radio. Refer to the computer's documentation or contact the computer manufacturer for more information. If you do not have a Bluetooth radio, install a Bluetooth USB adapter (dongle).

- 1 Turn on Bluetooth on the computer. For instructions, see the computer's documentation or contact the computer manufacturer.
- 2 Double-click the Bluetooth icon in the system tray, near the clock.
- 3 Click Add a device.
- 4 With the headset turned off, press and hold Talk for six seconds. The LED blinks blue and red rapidly and pairing mode is activated.
- 5 Double-click the UBHS-H5 icon on the computer or highlight the icon and click Next.
- 6 Click Close after the headset has been paired.

Note: To use the headset, it must be selected as default recording and playback device on the computer.

- 7 Click Start, then click Control Panel.
- 8 Click Hardware and Sound, then under Sound, click Manage audio devices.
- 9 On the Recording tab, select Headset Microphone Bluetooth Hands-free Audio, then click Set Default.
- 10 On the Playback tab, select Headset Bluetooth Hands-free Audio, then click Set Default.
- 11 Click OK.

## FCC Information to User

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Caution

Modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**FCC Compliance Information** : This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

**IMPORTANT NOTE:****FCC RF Radiation Exposure Statement:**

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

“This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.”

**Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.**

## LED light messages
