21 August, 2006

Attention: Nemko Canada Responsible: Stewart Beck

FCC ID: UH3-LIVETRACK

Product Name: Livetrack Reader

Request for Approval

We want to certify all versions of the Livetrack Reader as soon as the difference between each model is quite small.

Here are the four possible models with its unique characteristics:

LS : Long enclosure.

LSB: Long enclosure with Bluetooth connection.

SS: Short enclosure.

SSB: Short enclosure with Bluetooth connection.

Each model has an "S" in the model number because they all have serial connection.

The long enclosure and the small enclosure is made out of the same plastic and is not composed of any additional parts. The reader can include a Bluetooth connection or not.

The models in test include a Bluetooth connection.
