## 1 Perface

This guide provides information on configuring the KJ-8501. It is written specifically for the user who installed with this model.

## 2 Interactive voice response system(IVRS) flow

KJ-8501 car terminal system builds in with an Interactive Voice Response System (IVRS). User is not required to memorize a list of complicated instructions. Instead, user can just simply dial in to the car system, and then control the vehicle or modify the system setting follow the verbal instruction.

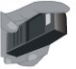

The IVRS flow as follow:

For system setting, IVRS would be very useful. In general, any phone is available to communicate with this system. However, SMS service enable phone is required for

### 3 System setting

#### 3.1 IVRS change password

		
Dial in the car terminal, after key in valid password, press "0" for voice instruction:  "Press 1 for Arming, Press 2 for Disarming, Press 3 for Car finding, Press 4 for Positioning, Press 5 for Enquiry, Press 6 for Monitoring, Press 7 for Reply"	Hear "Beep" once. Then press "4" and hear a long "Beep". Entry 6 digit new password, end with "#", then hear "Beep! Setting complete. Repeat press * key, finish press #"  Press "#"	Then hear "Data transmitted complete, please wait."  "Beep" three time and called terminated  Car owner will receive a SMS of the emergency contact list and their password

#### ⚠ Note:

The default password of car terminal system is "123456". Please change the password after purchase and change regularly.

#### 3.2 Swap between Auto / Manual mode

##### ●Swap to manual mode (from auto mode)

	
Hold on the remote button for 30 seconds	Light indicator on remote turned off

##### ●Swap to auto mode (from manual mode)

	
Hold on the remote button for 10 seconds	Light indicator on remote flashing get faster

To distinguish between auto / manual mode

It is recommended to set car owner's or vehicle user's mobile number as the first contact, and set the relatives as the second and third emergency contact.

For details, please reference to **Appendix 2. Alert message notification description**

## 4 Signal light description

### 4.1 Signal light description

#### ● System status indicator (Red)

System status	Indicator
Disarming	On
Arming	Flashing
Communicating	Off

#### ● Communication indicator (Blue)

Communicating status	Indicator
Normal communication signal	Flashing
Weak or no signal	Off
Communicating	Flashing

#### ● Positioning signal light (Green)

GPR signal status	Indicator
Valid positioning signal	On
Invalid positioning signal	Flashing
No signal	Off

#### ⚠ Note:

When ACC "ON", all signal lights (system status, Communication and Positioning) will turn off 3 seconds after brake.

All signal light resumed after door open or ACC Off.

### 4.2 Alert message notification description

Alert situation	Alert target / method	
Door being opened	First contact	Voice call and SMS door open alert send, along with location information
	Second contact	
	Third contact	SMS alert with location information (GPS RMS format)
Remark:	Car door open / break under arming status	

Alert situation	Alert target / method	
Engine started	First contact	"Engine Started" voice call and SMS alert send, along with location
	Second contact	
	Third contact	SMS alert with location information (GPR RMS format)
Remark:	Engine started under arming status	

Alert situation	Alert target / method	
Door being shocked	First contact	"Car shocked" voice call and SMS alert send, along with location
	Second contact	
	Third contact	SMS alert with location information (GPS RMC format)
Remark:	Car being shocked or hit under arming status	

Alert situation	Alert target / method	
Emergency call activated	First contact	
	Second contact	Emergency call and SMS alert send, along with location
	Third contact	SMS alert with location information (GPS RMC format)
Remark:	Emergency activated under arming and normal status	

Alert situation	Alert target / method	
Power Shortage	First contact	"Power shortage" voice call and SMS alert send, along with location
	Second contact	
	Third contact	SMS alert with location information (GPS RMC format)
Remark:	Power shortage under arming status	

Alert situation	Alert target / method	
System being	First contact	"Security system broken" voice call and SMS alert send, along with location
	Second contact	
	Third contact	SMS alert with location information (GPS RMC format)
Remark:	Cut off / broken the power supply under arming and normal status	

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

#### **Federal Communications Commission (FCC) Requirements, Part 15**

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.**
