2. The requirement of power supply regulation: The part number of the power regulator is U16.

Below items have not been fulfilled in module approval request:

The requirement of RF shielding: §15.212 rules require “shielding” but guidance in KDB996369 asks that the shielding design must fully enfold the RF circuitry. The module contains a shield but due to integration of the antenna in to the same package as the transmitter circuitry, the shield does not fully enfold the RF circuitry. Please refer to the document Operation description_shielding information for more detail information.
