

April 3, 2023

To whom it might concern,

We, Salto Systems S.L., located in Pol. Lanbarren, C/Arkotz 9, Oiartzun, Gipuzkoa, Spain, declares that our products W41M and W81M:

FCC-ID: UKCW41M
IC-ID: 10088A-W41M
PMN: XS4 Original+ / XS4 One S
HVIN: W41M

Has two denominations in order to characterise its final shape: XS4 Original+ and XS4 One S. XS4 Original+ is rounded shape version (strategy used for W41M), while XS4 One S is squared shape version (strategy used for W81M).

These two denominations do not lead to different PCBs, meaning that they are identical from the RF point of view, and the difference described above do not lead to different RF performance or behaviour between the devices. Consequently, measurements performed over model W41M (XS4 Original+) are valid and representative for model W81M (XS4 One S).

Sincerely,

By: Borja Nieto
