Zinwave Ltd is a VC funded start up company. The 2700, 2776 distributed antenna products reflect the companies first product offering. The 2700, 2776 product embodies the company intellectual property which is confidential to Zinwave. Patents are pending in both the US and Europe relating to this IP.

The IP and product design details contained in these files are a differentiator between Zinwave Ltd and other commercially available products. It is essential that this remains confidential.

It is requested that this information remains short term confidential as it is commercially sensitive and also IP sensitive. Release of this technical information, ahead of a general product release, would be commercially damaging to Zinwave, impacting both the company valuation and viability.

Any such information released to date has been under a specific confidential disclosure agreement between a third party and Zinwave Ltd.

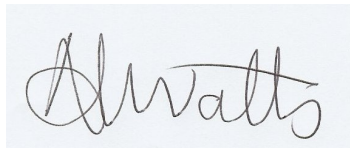

In addition it is requested that the following sub-set of the documentation remains *always confidential*.

It is requested that the information listed above remains always confidential as it is commercially sensitive and also IP sensitive. This level of detail would not be generally available even following product release and remains Zinwave Confidential. Release of this technical information would be commercially damaging to Zinwave, impacting both the company valuation and viability.

In addition to above request, it is also required to have permanent confidentiality for internal photographs. The reason for this request is that, unit is permanently mounted and not publicly accessible.

Yours sincerely
