RE: Longent, LLC

FCC ID: URFL800RDBS

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The Operational Description provided is not what I was looking for. The document you supplied shows how the device is set up when installed. What I am looking for is a description of how the device actually creates, modulates, and amplifies an RF signal before exiting the antenna port. Please provide.
- 2.) Please view the revised Internal Photos, page 14. This is the most important circuit board in the entire product but there is no corresponding photo of the underside of this circuit board. Please provide.
- 3.) I do not find an answer to my question #1 of November 28, 2006. I take note of your attestation letter from Mr. Liu Quan Shun, but this note does not tell me how. Please elaborate and expand on your answer. The Manual indicates that the passband is programmable down to 0.5MHz To me this seems to indicate that this device may also be designed to accommodate GSM or narrowband signals.
- 4.) I do not find an answer to my question #2 of November 28, 2006. Please provide.
- 5.) Your revised 731 form is signed by Mr. Liu Quan Shun. This is also the same person signing the Confidentiality request letter. But the FCC database still shows Mr. Rick Youngbar. How do we know if Liu Quan Shun is truly authorized to sign any FCC related documents on behalf of Longent LLC?

William H. Graff  
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
