

Security Code Information

FCC ID: [URNHT-580TAM](#)

Model no.: V1010

The handset and base are pre-registered sequentially in the factory with a unique 40 bit (2^{40} bit combinations) identification digital security codes, which are stored into the non-volatile memory. There is a registration procedure to register more handsets (up to 4 handsets) to a base. To prevent unauthorized registration a key is first to be pressed on the base.
