

RF Wireless Optical Mouse User Manual

Welcome

Thank you for selecting this product! Your RF wireless optical mouse uses a newly developed RF wireless technology 27MHz that replaces the traditional wired mouse. The receiver can be housed in the mouse.

Features

1. Radio frequency 27Mhz
2. 256ID code-- there is no interference even when multiple mice are used simultaneously
3. Automatic power-save sleep function to prolong battery life
4. Mini built-in receiver

Systems Compatibility

IBM PC and Win 95/98/Me/2000/XP

No driver needed

Receiver Installation

1. If you use PS2 connector, please use the USB to PS2 adaptor and connect with the connector before computer start-up
2. For laptop use, you may connect the receiver directly with the USB connector
3. For desktop PC use, it is suggested that you use an extended USB cable to connect your case and the receiver.

ID Setup

1. Place the mouse near the receiver
2. Press the ID button on the receiver. The receiver light will begin to flash
3. Press the ID button located on the underside of the mouse
4. The digital transmission between the mouse and receiver will complete within 10 seconds
5. The mouse is now operational
6. Working distance:4-6 feet

Attention

1. Keep the mouse within 4-6 feet of the receiver
2. Remove the batteries if the mouse will not be used for extended periods of time
3. Press either button or scroll the wheel of the mouse to activate while in the power-save sleep mode
4. To shut off power, press the ID switch of the underside of the mouse for 3 seconds

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a different circuit from the receiver.
- Consult the dealer or an experienced radio/TV technician for help.
