RE: Wallace Technologies, LLC

FCC ID: UUM10157V10

IC: 6873A-10157V10

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

- 1) While this version has the capability of measuring conducted power, it needs to be shown that the power is equivalent to what was previously certified. Since the previous unit cites that attempts to attached conducted ports were unsuccessful, comparison of power from this unit to the previous unit needs to be done using the same test method. EIRP calculated from radiated emissions should be done and shown to be with +/- 3 dB of the original application. Please provide.

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
