

The Power-Pole is a wireless gateway that command the Receive box relay to switch the anchor motor up or down .

Product Description Information

| Product Detail | Description |
|------------------------|------------------------------------|
| Model Number(s) | RC-747W-JLM-D |
| Transmit Freguence | 315 MHZ |
| Software | ASK |
| PCB Material | FR4 |
| Product Weight (grams) | 27 |
| Product Size (mm) | Length=63 Width=48 Height=12 |

Application Environment Parameters

| Parameter | Units | Tolerance | Nominal | Lower Limit | Upper Limit |
|--|-------|-----------|---------|-------------|-------------|
| Operating Voltage | Volts | N/A | 12 | 9 | 15 |
| Operating Current BT | mA | 5 | 10 | 8 | 12 |
| Operating Temperature (T _{OPER}) | °C | N/A | 25 | -10 | 60 |
| Storage Temperature (T _{STOR}) | °C | N/A | 25 | -30 | 85 |
| Humidity(Moisture) | %RH | +/-10 | 85 | 10 | 90 |
| Random Vibration(Frequency) | Hz | N/A | N/A | 20 | 2000 |
