

FCC Letter for Limited Modular Approval

Date: July 22, 2025

Request for Transmitter Limited Modular Approval

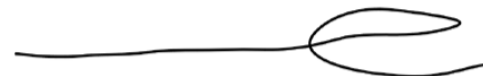

Model: 2021000193
FCC ID: UXURC4U6

The modular transmitter complies with the following requirements in FCC Part 15 Section 15.212 for Limited Modular Approval:

Transmitter Module Characteristics:

		Requirement	Explanation
1.	N	The radio element of the modular transmitter must have its own shielding.	The module does not have shielding. Permissive change applications will be required to add new hosts not covered by this original application (see question 5).
2.	Y	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided).	No such inputs are provided as the control and data (push-button) interfaces are integrated into the module. There are no external inputs.
3.	Y	The modular transmitter must have its own power supply regulation.	Power supply regulation is provided by dedicated IC U1 (refer to schematics)
4.	Y	The modular transmitter must comply with the antenna requirements of FCC 15.203 and 15.204(c).	The antenna is integrated onto the module circuit board to comply with 15.203 and 15.204(c). Refer to product photos for antenna location.
5.	Y	The modular transmitter must be tested in a stand-alone configuration, i.e. the module must not be inside another device during testing.	The module has been tested in a stand-alone configuration as documented in this application. Additional testing has been performed with the module installed inside a host (remote control unit) to cover installation into this and similar hosts.
6.	Y	The modular transmitter must be labeled with its own FCC ID. If the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	The module is labelled on the circuit board with the FCC ID. The remote-control host devices use e-labeling to display the module's FCC ID using the app that is required to pair the remote and the blind.
7.	Y	The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.	No specific operating requirements (e.g. geo-location restrictions, indoor use restrictions etc.) apply to this transmitter.
