

DFS device channel plan and software operational declaration

Date: 2024-07-08

We, Ericsson Enterprise Solutions, Inc., declare that the device, FCC ID: UXX-S5A435A Model Name: S5A435A, does not have Ad Hoc on “non-US frequencies” and/or on “DFS frequencies “. Also, the client software and associated drivers will not initiate any transmission on DFS frequencies without initiation by a master.

Below is the channel / frequency plan for the device:

ERICSSON

The device passively scans DFS frequencies until a master device is detected. The control of this functionality is not accessible to anyone under any conditions. Furthermore, the firmware is protected by a special signature and CRC checksum. Signature and CRC checksum will be calculated and verified before firmware upgrade. Unauthorized modification to firmware will lead to the failure of verification and thus firmware upgrade will not be allowed.

Sincerely yours,
